Orofacial Myology: A Crash Course for Dental Professionals

Angie Lehman is an IAOM, (IAOM is the only professional organization to certify clinicians in the field of Orofacial Myology.), Certified Orofacial Myologist (COM) who has been exclusively practicing Orofacial

Myology since 2012 in York, Pennsylvania.

Lehman runs one of America's most successful and well-known private practices, Oral Myofunctional Therapy of York. Angie Lehman is a highly sought-after educator for medical, dental and allied health professionals. Angie Lehman is passionate to encourage all health disciplines to work collaboratively and to better understand oral function and craniofacial development. While incorporating therapy into their specific area of care.

Definition

Orofacial myology is a specialized sub-specialty with either speech-language pathology or dentistry, especially dental hygiene, that evaluates and treats a variety of oral and facial (orofacial) muscle (myo-) postural and functional disorders and habit patterns that may disrupt normal dental development and lead to tooth position changes (malocclusions) or can cause cosmetic problems. The principles involved with the evaluation and treatment of orofacial myofunctional disorders are based upon dental science principles.

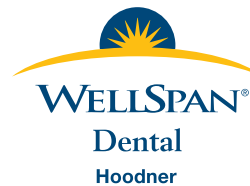

Learning Objectives

Upon completion of the course, the participant will be able to do the following:

- Understand normal vs. abnormal Oral Rest Posture
- Learn the role of the tongue and facial muscles in orofacial development
- Know the three most common contributors to Orofacial Myofunctional Disorders
- Gain confidence in screening patients for Orofacial Myofunctional Disorders
- Know when to refer patients for Orofacial Myofunctional Therapy (OMT)

Course Description

This half-day introductory course will give dental professionals an overview of the basic principles and science of Orofacial Myofunctional Therapy. Please join Angie Lehman, RDH, COM as she shares the history of OMT in dentistry, gives insight into current treatment of myofunctional disorders and delivers a unique and masterful take on ways to use therapy collaboratively to prevent future airway issues in your patients.
